

Implementing ISO 9001:2008: Process Mapping to Support Process Management

Presented to the ASQ Baltimore
Section -- January 12, 2010

By Kevin Gilson
Gilson Quality Services, Inc.

Agenda

- ◆ Introduction
- ◆ Requirements of ISO 9001:2008 audits
- ◆ Basics of Process Mapping
 - ❖ Symbolology -- keep it simple
 - ❖ Top Level Process Map -- the basic organization and what it does
 - ❖ Lower Level Process Maps -- the rest of the story
- ◆ Summary

Introduction

◆ Why this topic?

❖ June 13, 2009, Board Retreat

- ◆ Link between process and strategy
- ◆ Helped Board look at the effectiveness of strategy implementation

❖ Personal experiences in ISO audits

- ◆ Links between processes and the Standard
- ◆ Depiction of company's processes

What ISO 9001:2008 Requires

◆ 4.1 General requirements

❖ The organization shall:

- ◆ Determine the processes needed for the QMS..
- ◆ Determine the sequence and interaction....
- ◆ Determine criteria and methods needed....
- ◆ Ensure availability of resources and information
- ◆ Monitor, measure, analyze these processes...
- ◆ Implement actions to achieve planned results and continual improvement of these processes

ISO 9001:2008 Principles

◆ 0.2 Process approach

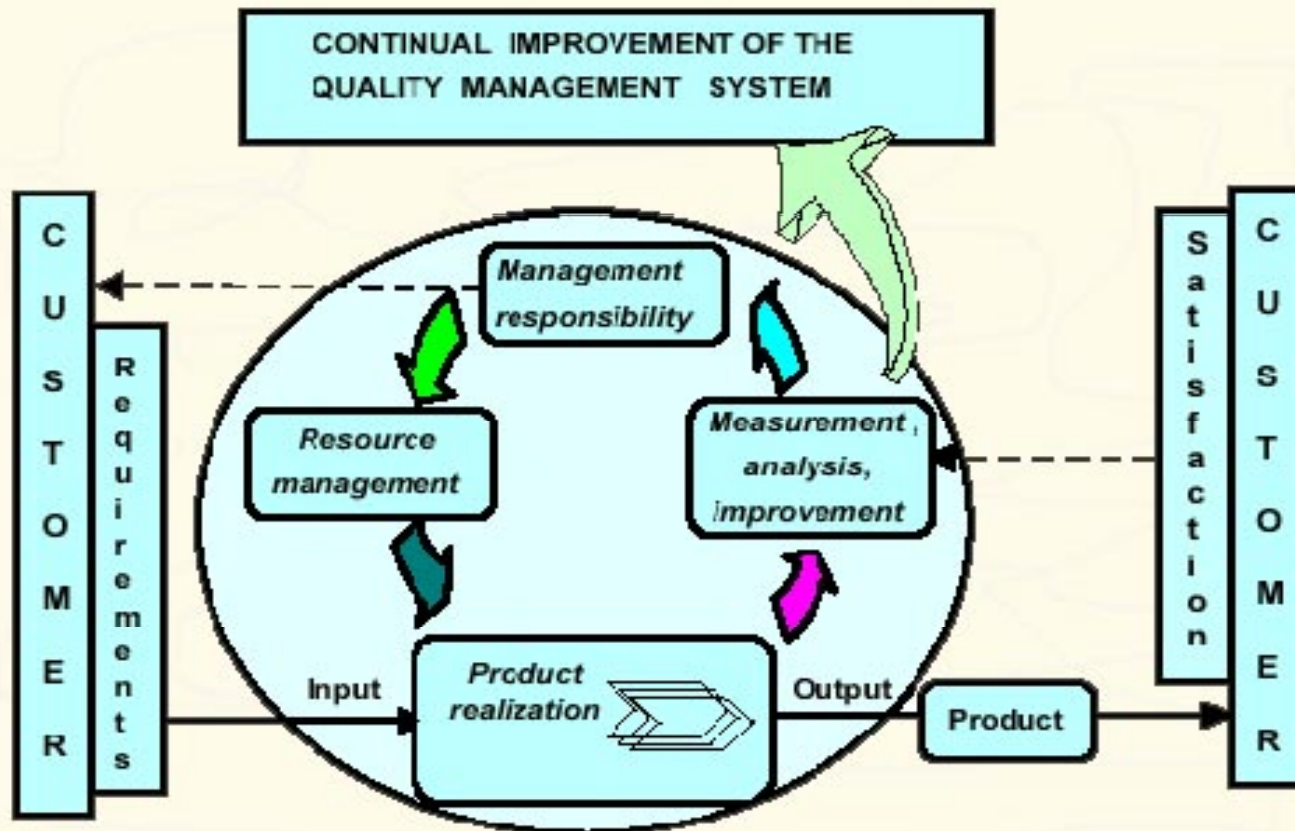

- ❖ ...promotes the adoption of a process approach when developing, implementing and improving the effectiveness of a quality management system...
- ❖ “For an organization to function effectively, it has to determine and manage numerous linked activities.”

ISO 9001:2008 Principles

◆ 0.4 Process approach

- ❖ “An activity or set of activities using resources, and managed in order to enable the transformation of inputs into outputs, can be considered as a process.”

ISO 9001:2008 Model

Other Standard Models

- ◆ Standard software development model
- ◆ Engineering development model
- ◆ Waterfall model of development
- ◆ ...right out of the textbook
- ◆ But...what is THEIR process???

Purpose of the Model

- ◆ Introduce the auditor (and customers or employees) to the company's processes
- ◆ Link the key business processes to the Clauses in the Standard
- ◆ Show how the organization actually implements the Standard

Process and Auditing

- ◆ Auditors are starting to:
 - ❖ Analyze processes for problem areas
 - ❖ Analyze product/service delivery
 - ◆ Evaluate customer complaints
 - ◆ Look at effectiveness of countermeasures
 - ❖ Evaluate interface effectiveness
 - ◆ Effect on variation
 - ❖ Assess risk to customers

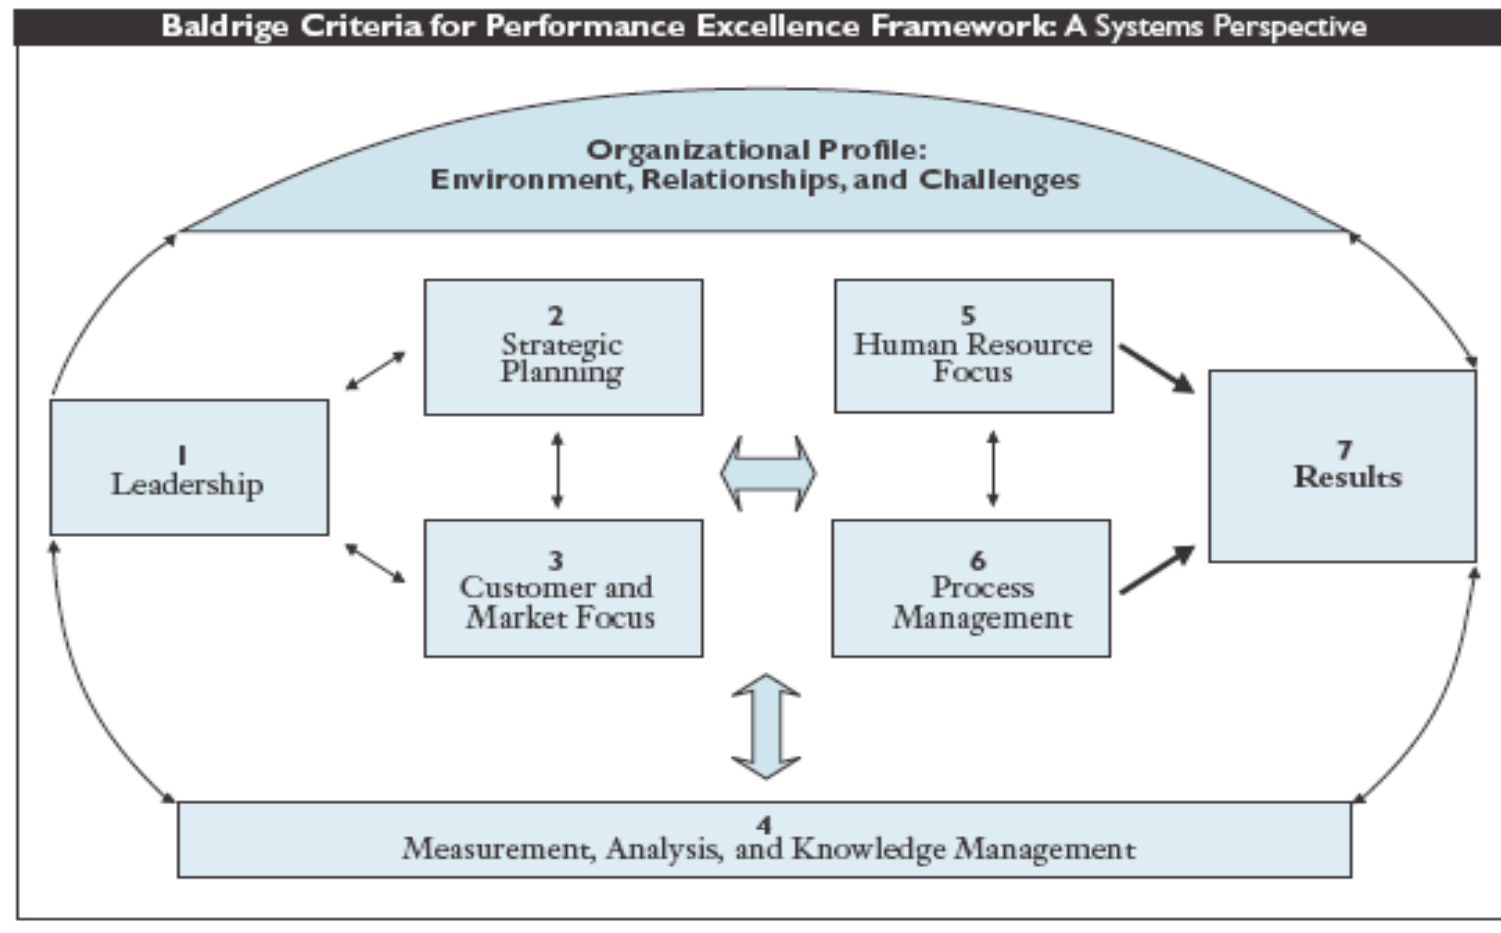

What do we Audit?

- ◆ Worksheets include:
 - ❖ Process being audited
 - ❖ Standard Clauses for that process
 - ❖ Inputs/linkages from other processes
 - ❖ Outputs
 - ❖ Measures related to strategic or process objectives
 - ❖ Effectiveness of the process audited

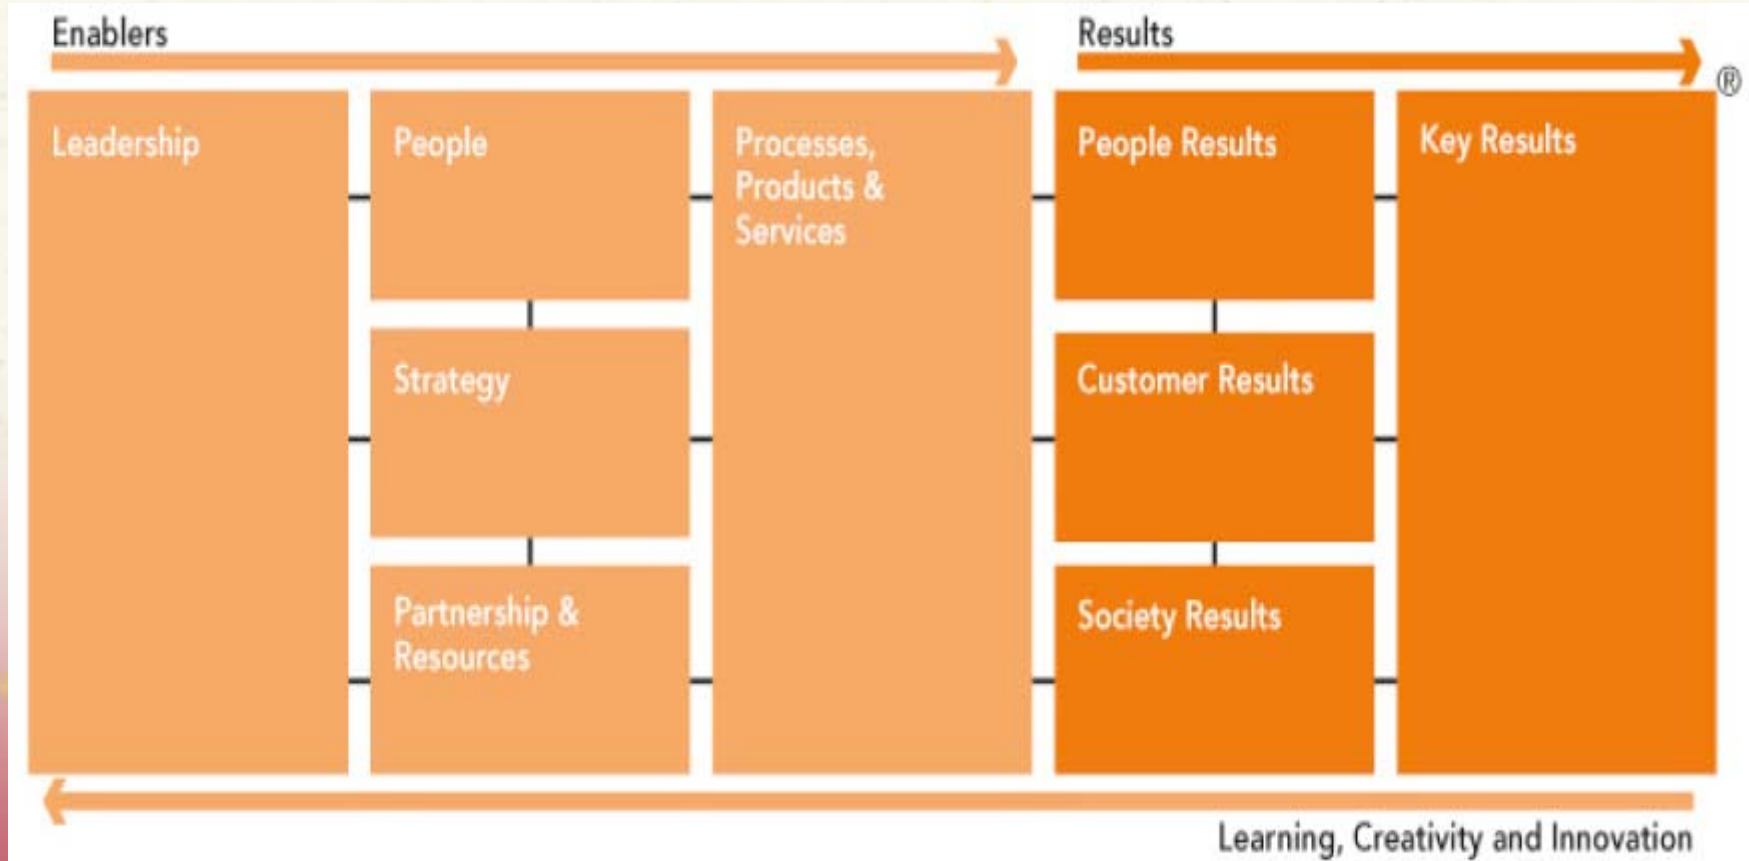

Importance of Process in Excellence Models

- ◆ The two leading world models of operational excellence have Process as key measures of excellence:
 - ❖ Malcom Baldrige National Quality Program
 - ◆ Category 6: Process Management
 - ❖ EFQM Quality Model 2009
 - ◆ Category 5: Processes, Products and Services

Malcom Baldrige National Quality Program

European Quality Model 2009 (EFQM)

What is a Process Map?

Begin with the end in mind.

S. Covey

What's Important About Process?

- ◆ Take a trip with me...
 - ❖ Identify the destination
 - ❖ Identify the mode of travel
 - ❖ Identify the constraints
 - ❖ Identify the route
 - ❖ Estimate the time
 - ❖ Locate intermediate stops/places to stay
 - ❖ Make appropriate arrangements

What is a Process?

- ◆ Remember the ISO 9001:2008 definition:
 - ❖ “An activity or set of activities using resources, and managed in order to enable the transformation of inputs into outputs, can be considered as a process.”
 - ❖ Key Ideas:
 - ◆ Inputs = Supplies, Resources, Customer
 - ◆ Outputs = product/service satisfying Customer requirements, needs and expectations
 - ◆ Activity = actions to transform inputs into outputs

Steps in Process Mapping

◆ Start with the Macro-Process

- ❖ Don't be tempted to begin with the micro-process or -processes
- ❖ Use the SIPOC diagram
- ❖ Expect between 3 and 6 major Activities
- ❖ Get agreement on the depiction!
- ❖ List Micro-processes below Macro-process activities on the diagram

Steps in Process Mapping

- ◆ Define the Output
 - ❖ What does the Customer require, need and expect?
- ◆ Define the Input
 - ❖ Suppliers, resources, other inputs
- ◆ Create the 3 to 6 Activities needed to create the desired Output
 - ❖ List micro-processes for each Activity
- ◆ Define the Feedback mechanism
 - ❖ Continual improvement and Preventive Action

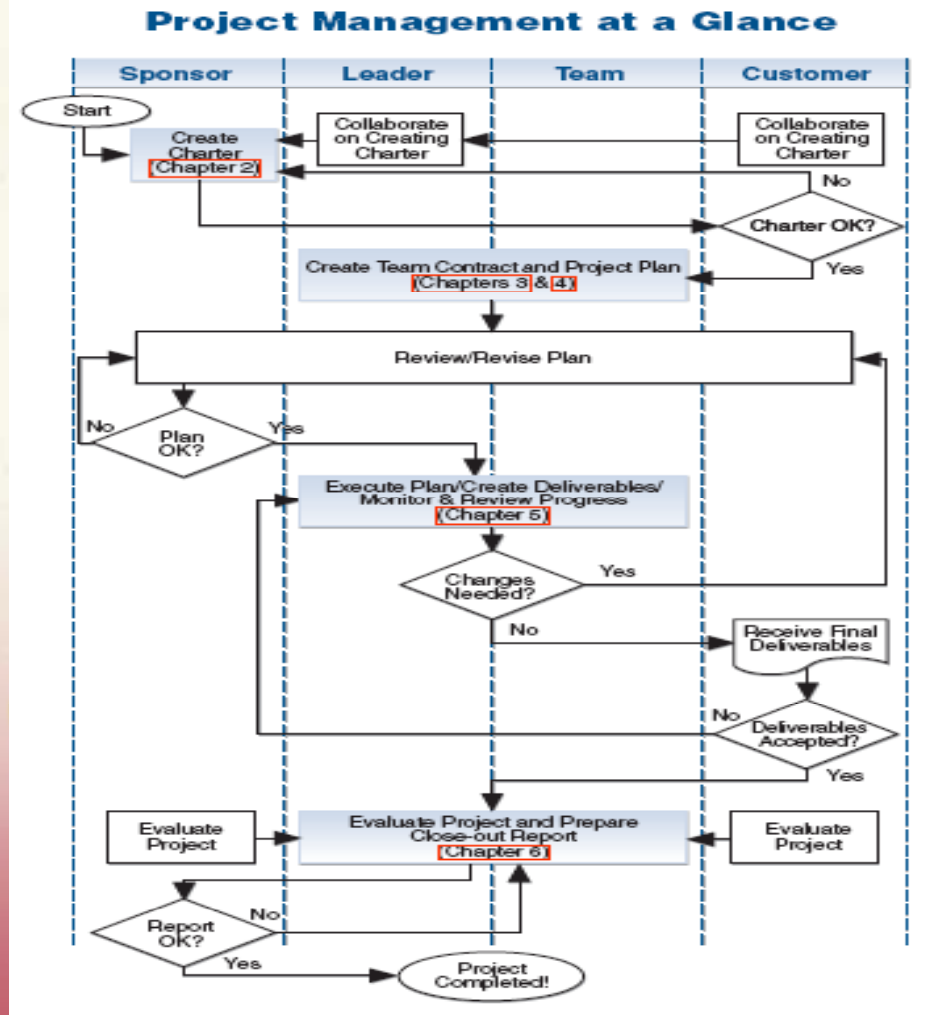

Oriel SIPOC Model from *The Team Handbook*

SIPOC Worksheet					
Project: _____				Date: _____	
Suppliers	Inputs	Process		Outputs	Customers
_____	_____	_____		_____	_____
_____	_____	_____		_____	_____
_____	_____	<div style="display: flex; align-items: center;"> <div style="border: 1px solid black; width: 40px; height: 40px; margin-right: 5px;"></div> <div style="margin: 0 5px;">→</div> <div style="border: 1px solid black; width: 40px; height: 40px; margin-right: 5px;"></div> <div style="margin: 0 5px;">→</div> <div style="border: 1px solid black; width: 40px; height: 40px; margin-right: 5px;"></div> <div style="margin: 0 5px;">→</div> <div style="border: 1px solid black; width: 40px; height: 40px; margin-right: 5px;"></div> <div style="margin: 0 5px;">→</div> <div style="border: 1px solid black; width: 40px; height: 40px;"></div> </div>	_____	_____	
_____	_____	_____		_____	_____
_____	_____	_____		_____	_____

Macro- Micro- Example

From: GoalQPC
Project Management
Memory Jogger

The Activity: From Waking to Arrival at Work

◆ Steps:

- ❖ Set Macro-process boundaries

- ❖ Using SIPOC:

- ◆ Describe the Macro-process Outputs
 - ◆ in customer terms
- ◆ Describe the Macro-process Inputs
- ◆ Identify in flowchart form the Key Activities to transform the Inputs into the Outputs
- ◆ List some of the Micro-processes

Relating SIPOC to ISO

- ◆ Create the Macro-SIPOC for your QMS
 - ❖ May need more than one to describe your organization's processes
 - ❖ Depict the Activities of your company
 - ❖ Determine the Micro-processes for each Macro-Activity
 - ◆ Create Micro-SIPOC's or procedures for each
 - ◆ For each Micro-process Activity, show the applicable ISO Clauses

Conclusion

◆ Process Maps

- ❖ Help auditors understand how to structure an audit
- ❖ Can show the link between processes and the ISO 9001:2008 Standard
- ❖ Provide a starting point for continual improvement
- ❖ Form the basis for procedures
